## Introduction

The CROSS PS 7510 angle laser is handy and simple to use. CROSS PS 7510 projects 2 laser lines at an angle of 90° and is ideal for tile and wood flooring. You can use it for laying tiles easily and neatly and make accurate and straight cuts. The integrated spirit levels make aligning easy. Sucker cups help with fixing on smooth surfaces. The scale allows diagonal work in steps of 5°.

## Safety instructions

Attention – laser radiation  
Never look into the beam  
EN 60825-1:1994 + A1:2002 + A2:2001  
P<sub>max</sub> < 1 mW; λ = 650 nm

### Injuries can occur if the following instructions are not observed:

1. The instructions for use shall be read carefully before using the tool in order to maintain a safe use. Keep the instructions for use.
2. The warning notice on the tool shall never be blurred or removed from the tool.
3. Paste the attached warning labels in your language over the original ones before the initial commissioning.
4. Never point the laser beam at the eyes of other persons or animals. Do not look into the light beam and do not focus the laser light by means of optical devices. This can damage the eyes.
5. Prevent children from using the laser meter. They can inadvertently injure themselves or others.
6. Please always switch the laser off after your work or during longer intermissions.
7. Let the repairs of the measuring device be made only by a qualified specialist and using original parts in order to maintain the tool secure and under warranty.
8. Do not use the tool in an environment with flammable or explosive gases.
9. Remove the batteries when not using the tool for a longer period of time.

## Warranty

Congratulations!  
Thank you for choosing ProfiScale quality measuring technology by BURG-WÄCHTER. BURG-WÄCHTER offers a warranty of 2 years duration from the date of purchase. The warranty does not cover damage caused by improper use, overloading the device or incorrect storage as well as normal wear and defects that only have an insignificant effect on the value or usability of the device. The warranty shall be immediately invalidated if unauthorized persons work on the device. In the event that a warranty claim arises, please hand over the entire device incl. packaging, description and batteries along with the sales receipt to your dealer.

## Technical data

Length of laser line	max. 8 m (depending on lighting conditions)
Accuracy	+/- 0,1°
Laser output rating	< 1 mW
Laser wavelength	650 nm
Operating temperature	0° C to 40° C
Power supply	3 batteries 1,5V AA (e.g. LR 6)
Dimensions	150 x 150 x 51 mm

## Operation

- Place the tool flat on the floor.
- Switch the tool on and off using the button A.
- On smooth surfaces, fix it using the button C.
- Always adhere to the safety instructions.
- Switch the tool off after use, it does not power off automatically.
- Check the position of the tool when working, it is not self-levelling.

## Battery replacement

If the laser lines are not visible after power on, open the battery compartment on the back and replace the batteries.

## Disposal

Dear customer,  
Please help us avoid unnecessary waste.  
Should you intend to dispose of this device at any time, please remember that many components of this device contain valuable materials, which can be recycled.

Please be aware that electrical and electronic equipment and batteries shall not be disposed of as household waste, but rather collected separately. Please obtain information on the collecting points for electrical waste from the responsible authority of your municipality.

If you have any questions concerning the EC declaration of conformity, please use [info@burg.biz](mailto:info@burg.biz)
